Big News! **BlowHard Steps into the** **Training Realm...**

Hello BlowHard Fans!
As you know, we've been compiling videos and
literature for the firefighting industry.

**This education gives you a stronger foundation,
beyond a single CFM number, providing the**

understandable manner.

This brake-through information is more extensive and comprehensive than anything presented...ever, and has been recognized by *Tall Buildings Fire Safety Network*.

In response, they have asked BlowHard to present this year at FDIC.

**We invite you to attend Tuesday April 8th at 10:20am:
*Optimizing Fan Performance for Stairwell
Pressurization and Evacuation.***

**Presented by Michael Hadlock,
Owner and Engineer of BlowHard Fans.**

Conference Agenda

Indianapolis, US
Tuesday,
April 8th 2025

TUESDAY APRIL 8TH 2025

DAY 2

Chairperson: Ben Levy (UK) NFCC

- 08:45 Delegate to be seated for conference
- 08:50 Housekeeping announcement
- 09:00 Official opening – David Rhodes: FDIC Educational Director
- 09:10 Keynote 3 – Jake Pauls: 'Reflections on a career in high rise fire safety' (Canada)
- 09:50 Presentation 9 – Mike Gagliano: 'Tall Building Air Management: Firefighter Air Replenishment System' (US)
- 10:20 Presentation 10 – Mike Hadlock: Optimizing Fan Performance for Stairwell Pressurization and Evacuation (US)**
- 10:50 Presentation 11 - Katherine Lamb: 'Command and Control at High Rise Incidents' (UK)
- 11:50 Presentation 12 – Justin Lange: 'A science and experience based operational model, low staffing response proposal' (Chile)
- 11:20 Coffee and networking
- 12:10 Presentation 13 – Ray O'Brocki: 'Fire Safety on High Rise Construction Sites' (US)
- 12:40 Question Time for Speakers
- 13:20 Break – various options for lunch are available.
(Note: lunch refreshments are not included in delegate fee)
- 14:00 Keynote 4 – Sponsor Presentation
- 14:40 Presentation 14 – Sean De Crane: 'Lithium-ion Batteries: Fire Service Perspective' (US)
- 15:10 Presentation 15 – Brandi Srda: The challenges of an EV Fire in a subterranean parking garage (US)
- 15:40 Presentation 16 – Charles Jennings and Glenn Corbett: 'Towering Inferno at 50 Years: Accessing the Legacy'
- 16:10 Day 2 – Debate with Expert Panel
- 17:00 Conference Day 2 closes

For the ***first time ever***, BlowHard defines PPV Fan Performance in a physics-based, mathematically-driven model.

The following video is a very, (very) condensed overview of the correlations of Fan Size, Power, Thrust, Setback, Entrainment and Structure Response...

Big Reveal

**FDIC
BOOTH 2735**

**XPERIENCE
THE
XTREME**

In case you missed last month...

Hello BlowHard Fans!

Heading out to each call with more than just luck in your pocket, you're armored with courage, experience, education and training. This month we're sending more knowledge to take with you!

Education Station

PPV Airstream Types

Cone

Straight Jet

BlowHard High-Flow Expansion Jet

This video brings into context the entrainment types from last month in correlation to the different types of airstreams.

Learn the differences, pros, and cons.

****The Squirt, Quickee, Commando, all have the High-Flow Expansion Jet**

video

Did You Know...

The three most important components of
PPV Fan Performance are:

Airstream Size

Entrainment Type

Power

BlowHard is the only company that uses the physics of
all three to drive PPV engineering & design!

**We see that you're having lots of demos,
conducting testing, and giving positive feedback on
the new Squirt w/ Smart-Tec!**

...but did you think we were going to stop there?

**Once again, make sure to pack your bags for FDIC
and get to **Booth 2735** to see how 2025 is going to
equip you with even more PPV innovation!**
