

## July 2024 Newsletter

**Welcome the \*\*Brand New\*\***  
**BlowHard Squirt**  
**“Everybody’s Little Buddy”**

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

## So Little. So Powerful.

BlowHard strikes again by decreasing the size of the fan yet keeping the power, increasing the runtime, AND increasing the battery life!

Info on the Squirt  
and our new Technologies...

**Ordering is now open  
for demos!**

### Pricing:

**Demo Squirt only: \$1,750**

**Demo Squirt Kit: \$2,250**

**1 Squirt**

**1 Misting Ring**

**1 High-Flow Mister**

**1 12" Ducting**

**1 Truck Mount**

**Shipping will begin in late  
August/September**

**Place your orders at**

**[sales@blowhardfans.com](mailto:sales@blowhardfans.com)**

Specification		Specification	
Blade Size	17" (432mm)	Battery	Li-ion
Size	17.75"x18.1"x10.5" (451mm x 460mm x 267mm)	Battery Cycle Life	Up to 1000 full discharges.
Weight	38 lbs (17.7kg)	Dual-Powered	Dual-Powered Run on battery or AC, seamless automatic switching.
Max CFM	11,200 AMCA equivalent (19,028 m3/h)	Ingress Protection	IP-67
Control System	Smart-Tec by BlowHard	Noise	82Db @ 10 ft (3m) 88Db @ 40in (1m)
Runtime	55+ minutes at 11,200 CFM (19,028 m3/h), 6+ hours at 6,000 CFM (10,194 m3/h)	Head Tilt	Ergo Fold 0 – 180 degrees
Charge Time	0% – 90% in 2 hours. Complete charge time 3 hours. No memory.	2-Year Warranty	All our fans come with a 2-year warranty protection.

The Commando Days of Summer promo  
is in full swing!

Sell a Commando in June/July/August/September and your customer will receive a FREE Wheel Kit (\$500 value) OR a \$400 rebate.  
U.S. or Canada only.  
Contact Rebekah at [rhadlock@blowhardfans.com](mailto:rhadlock@blowhardfans.com)  
for full details.

\*Assembly instructions will be sent with each wheel kit

Understand that when you sell BlowHard fans,  
you can do so proudly!

BlowHard is an OEM (Original Equipment Manufacturing) business. We do not buy any “off the shelf” stock parts as our competitors do. Each fan model has more than \$1,000,000 into its design, R&D, molds, casting, prototypes, & testing. We literally engineer and design all major parts of our fan to achieve maximum performance which off the shelf parts cannot provide. We design the Shroud, Grills, Blade, Operator Interface, Control System, Motor, Brake Assembly, Handles, Straps, Lid, Box, Wheel Kit, Cord Magnet, Misting Ring, Ducting, Truck Mount, even the Big-Ass Batteries.

feat!

We are also family owned & operated and work hard to get it all done right here in Oregon!

The reason we design from scratch is that we don't want to simply purchase shelf parts and stick them together to make a fan that blows air, then market it for firefighting.

It is backwards to create a product based on a mix of parts which leads to ineffective component compatibility. BlowHard always starts with the laws of physics, math, airflow dynamics, and fan-law to create PPV fans that are compact, powerful, and innovative. BlowHard fans are designed **for** Firefighters to control airflow and suppress fires.

BlowHard has shifted the industry in impactful ways!

\*We created the first battery operated PPV fans and still the only ones to have powerful, integrated batteries.

\*We deigned the first folding PPV fan.

\*We created PPV fans light enough for single-person deployment.

\*We invented High-Flow Jet Technology.

\*We engineered the only "smart" fans on the market with our Smart-Tec System.

**THANK YOU** for being part of BlowHard's mission to progress the industry and save lives!
