

### **Hello BlowHard Dealers and Staff!**

We see that you're having great success with the Squirt and accessories! Lots of demos, testing, and positive feedback on the Smart-Tec System!

...but did you think we were going to stop there?

Once again, make sure to pack your bags for FDIC and get to **Booth 2735** to see how 2025 is going to be an even bigger year for BlowHard PPV Innovation and your sales!

#### RSS 🔊

# **Education Station**

Last month we brought you information on the 3 different ways airstreams entrain air.

This next video correlates those <u>Entrainment types</u> with <u>Airstream types</u>...

## **Airstream Types:**

Cone

Straight Jet

**BlowHard High-Flow Expansion Jet** 

Learn the differences of each and how our Expansion Airstream puts BlowHard in a performance category above all other battery-operated PPV fans!

## **Airstream Entrainment**

There are 3 different types:

## Venturi Viscus Drag Turbulent Mixing

\*\*Rather than buying off-the-shelf parts and being unaware if entrainment is occurring, BlowHard starts with the above physics in our engineering to ensure our fans maximize efficient entrainment by leveraging both Venturi and Viscus Drag!

\*\*As always, please reach out with any questions! rhadlock@blowhardfans.com

The three most important components of

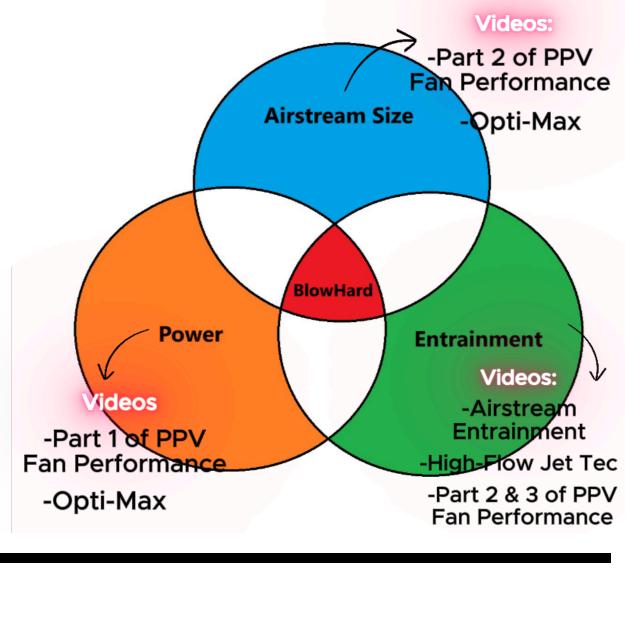

Translate -

Airstream Size

**Entrainment Type** 

#### **Power**

BlowHard is the only company to engineer all three of these components into each fan!
