

## May '25 Newsletter

### Greetings from BlowHard!

May's Newsletter is PACKED to the brim  
with updates and information!

April was a big month for Blowhard, launching 2 new fans at FDIC and introducing our ground-breaking, science-based model for accurately testing and understanding the performance of PPV fans.

change & forward movement in the Fire and Rescue Industry!

# **HOTTEE** Quickee **XTENDO**

**Please note the Hottee and Quickee Xtendo production timeline:**

**Our goal is to have these fans to our dealers this Summer and in production by Fall**

**\*\*Stay tuned for introduction videos!\*\***

## **\*\*New Catalogue\*\***

Be sure to head to the **Dealer Portal** on our website to download our new Catalogue! It includes all of our fans featuring the new X-Series line as well as a comprehensive spec chart, accessories, and description of technologies.

**Make sure to add it to your website!**

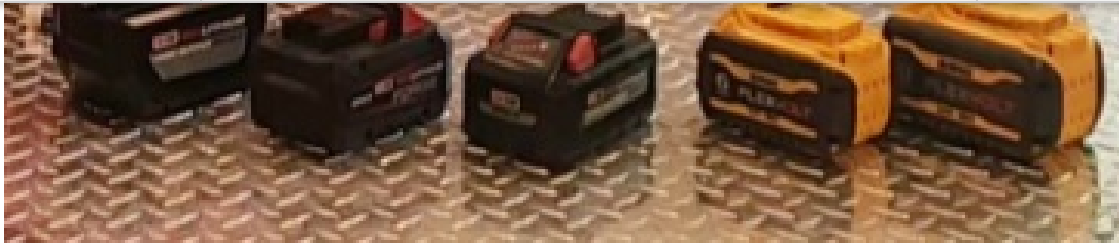

# BLOWHARD™

LEADERS OF SCIENCE-DRIVEN TECHNOLOGY & INNOVATION

## Education Station

## It's time to talk batteries!

We're launching a 3 part series all about batteries. We may be sending you part two later this month so be on the lookout!

### Batteries Part 1:

Specs-Understanding Power and Runtime

### Batteries Part 2:

Integrated vs Hot Swappable

### Batteries Part 3:

Hot Swappable vs BlowHard Power Sharing

**Help raise money to go to revolving, non-profit foundations for Firefighters!**

15:40 Presentation 16 – Charles Jennings and Glenn Corbett: 'Towering Inferno at 50 Years: Accessing the Legacy'

16:10 Day 2 – Debate with Expert Panel

17:00 Conference Day 2 closes

For the ***first time ever***, BlowHard defines PPV Fan Performance in a physics-based, mathematically-driven model.

The following video is a very, (very) condensed overview of the correlations of Fan Size, Power, Thrust, Setback, Entrainment and Structure Response...

and its Airstream Work

Let's get

**BLOWHARD**

...and while you're at FDIC...
