

October Newsletter

Education Station:

Hello Dealers and Sales Staff!

In August and September we gave you
Phase I and Phase II videos of the overarching

BlowHard Design Trifecta:

High Flow Jet Technology
Ergo-Fold

This month we bring you Phase III...

The **Opti-Max** Design:

Watch this short video to understand how we maximize performance within the smallest space possible.

Did you know...

All of the videos we've made are available on our **Youtube Channel** for you to share with your customers as selling points, and to help them learn more about BlowHard Fans.

Know before you go!

The BlowHard Squirt and accessories are shipping!

Watch this short video on how we might demo the Squirt, highlighting its technologies and features.

****NEW****

BlowHard Accessories

Misting Ring:

The Misting Ring is UNIVERSAL to all BlowHard Fans. It is magnetic for fast and easy set-up. With 8 nozzles blowing out cool mist, it is perfect for firefighter or civilian heat recovery.

High-Flow Mister:

The High-Flow Mister is also UNIVERSAL to all BlowHard Fans and magnetic. Super popular in Europe, the High-Flow Mister puts out a powerful 60L per minute wall of water to create a protective wall between buildings to stop fire from jumping and spreading.

Ducting:

The BlowHard Ducting is FAN SPECIFIC and currently offered for the Squirt only.

It fits snug around the shroud and stays connected to its case for easy deployment and repackaging.

The picture on the right shows 2 ducting units: One packaged up and one open, connected to a Squirt.

With a 12" diameter and a 10m /32ft length, the BlowHard Ducting makes it quick and easy to get fresh air into small, difficult to reach places.

Truck Mount:

The BlowHard Truck Mount is FAN SPECIFIC and currently offered for the Squirt only. No more worry of a fan falling in transit causing damage to it or other tools on the apparatus.

This robust Truck Mount keeps the Squirt safe and secure while at the same time keeping the space compact and tidy.

Commando Wheel Kit:

With 16,200 CFM the Commando was created to replace gas-powered fans. As you just learned with Opti-Max, we scaled up our Battery, Shroud and Blade for bigger airflow and bigger power. Still being smaller and lighter than gas-powered fans for stairs and portability, the wheel kit is a great option for ground maneuverability.

Ultra Flat & Compact

Handle: Lifts and Locks
Feet: Press to Open/Close

In case you missed it...

High-Flow Jet Technology

video

BlowHard has separated from all other PPV fan manufactures who have either the Cone or Jet airstream.

High-Flow Jet is an Expansion Jet airstream, engineered by BlowHard, giving our fans the leading edge.

- *Big Performance
- *Increased Entrainment
- *Increased Pressure
- *A Huge Area to Seal.

Ergo-Fold Design

video

Ergo-Fold is more than just a convenient folding fan. Understand and share the options this unique design delivers to your customers, and why it's superior to all other copies in the market today.

Introducing the BlowHard Squirt!

video

The Squirt was designed to be an Ultra-Compact and Highly Maneuverable PPV fan with big Power.
