

May '25 Newsletter

Greetings from BlowHard!

April was a big month, launching 2 new fans at FDIC and introducing our ground-breaking, science-based model for accurately testing and understanding

the performance of PPV fans!

With BlowHard innovations, we're excited to deliver advancements in technology for forward movement in PPV for the Fire and Rescue Industry!

****NEW FANS!****

HOTTEE **Quickee**
XTENDO

****Please note****

**The Hottee and Quickee Xtendo
are *not* in production yet!**

**Our goal is to have these fans to our dealers this
Summer and for sale by Fall**

Education Station

It's Time to Talk Batteries!

Today launches a 3 part series all about batteries. We may be sending Part Two later this month so be on the lookout!

Batteries Part 1:

Specs-Understanding Power vs Runtime

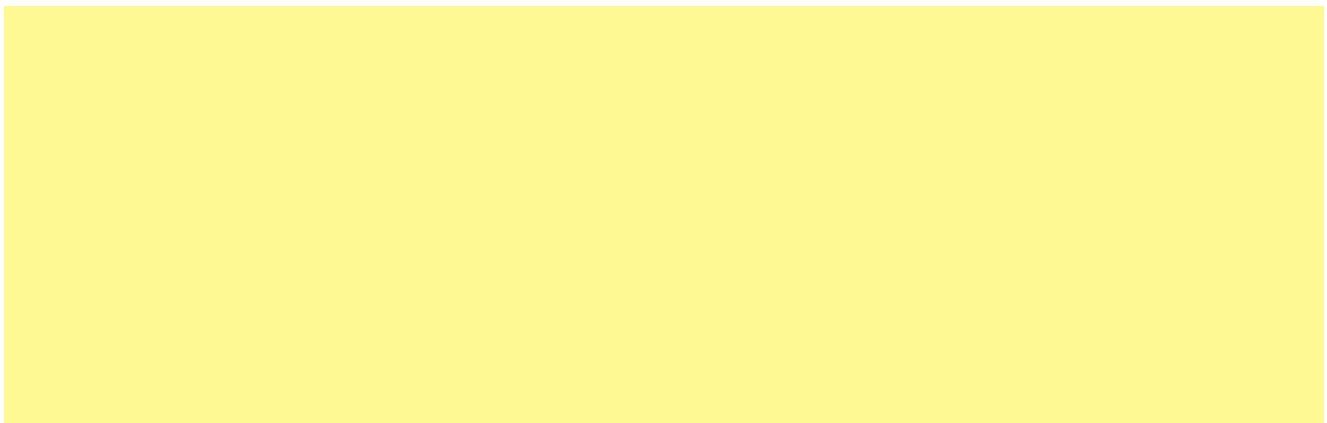

Batteries Part 2:

BlowHard Integrated vs Hot Swappable

Batteries Part 3:

Hot Swappable vs BlowHard Power Sharing

In case you missed last month...

Big News!

BlowHard Steps into the Training Realm...

As you may know, we've been compiling videos and literature for the firefighting industry.

This education gives you a stronger foundation, beyond a single CFM number, providing the Fundamentals of Fan Performance in a simple and understandable manner.

This brake-through information is more extensive and comprehensive than anything presented...ever, and has been recognized by *Tall Buildings Fire Safety Network*.

In response, they have asked BlowHard to present this year at FDIC.

The following video is a very, (very) condensed overview of the correlations of Fan Size, Power, Thrust, Setback, Entrainment and Structure Response...
