

August '25 Newsletter  
Greetings from BlowHard!

## Education Station

We always talk about PPV fan performance  
but what about fan size?

In this video we compare sizes of the most  
common brands...and it's truly mind blowing!

**BlowHard is on the move again and it's play time!**

**If your dept is located in NW Oregon or  
SW Washington and would like to help with  
product testing, please contact us at  
[rhadlock@blowhardfans.com](mailto:rhadlock@blowhardfans.com)**

**In Case You Missed Last Month...**

**Education Station**

# Batteries!

Part 3 of 3:

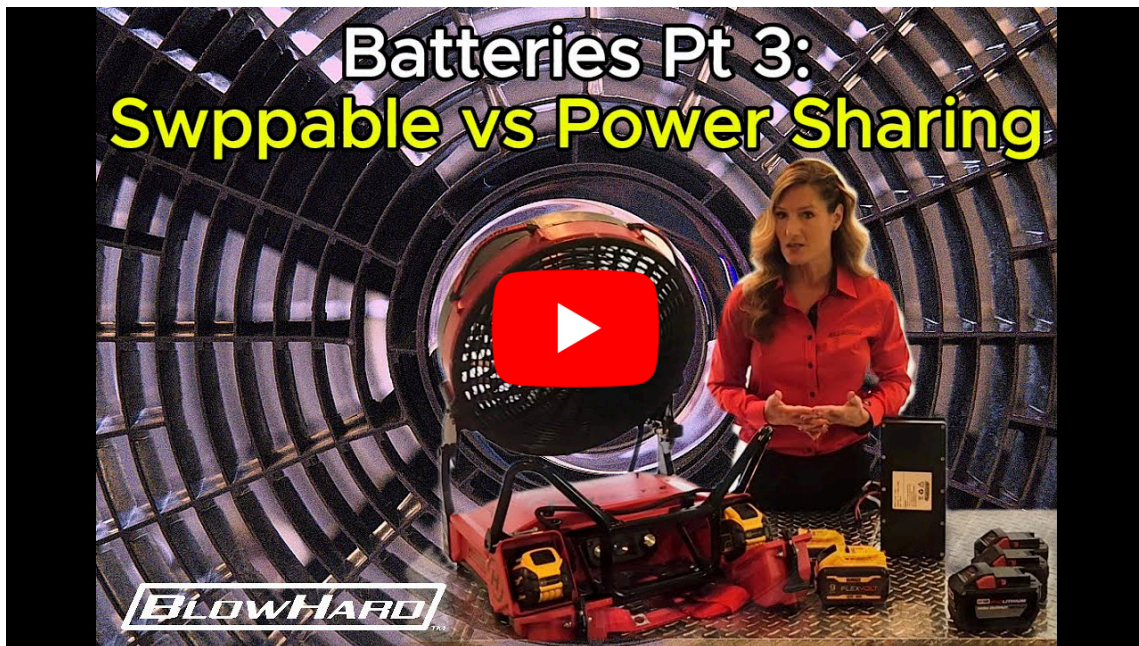

**Hot Swappables**

**vs**

**BlowHard Power Sharing**

Information in this video introduces  
BlowHard ***Power Sharing***.

Our new technology allows the Hottee to constantly monitor each swappable battery independently to deliver the highest amount of power possible while still protecting against overheating and damage.

## Shipping Changes For Dealers Within The United States:

It has always been part of BlowHard

support to help with shipping costs.

However, it is quite common for our production and shipping team to send out "onesie-twosie" parts daily, often multiple shipments to the same location.

Without combining orders, this ends up being time consuming and costly as shipping costs have *greatly* increased.

## **Starting July, 2025:**

**BlowHard will offer free shipping on warrantied repair parts within the United States.**

**BlowHard will offer free shipping on all non-warrantied repair parts within the United States only on purchases over \$100.**

When you need a small replacement part for a fan, consider ordering several more for stock either at that time or with your next fan order. This will also help with quick repair service.

We are also working to create a BlowHard Replacement Part Kit consisting of most common parts that are handy to have on hand for quick repair ie: feet, shoulder straps, brake assembly bolts/washers, power cords, etc.

Stay tuned!
