

## July '25 Newsletter

### Greetings from BlowHard!

Summer is in full swing and we're hoping you're getting in some good family time with BBQ's and Sunshine, or as Darius Rucker sings... Beers and Sunshine!

### Education Station

#### Batteries!

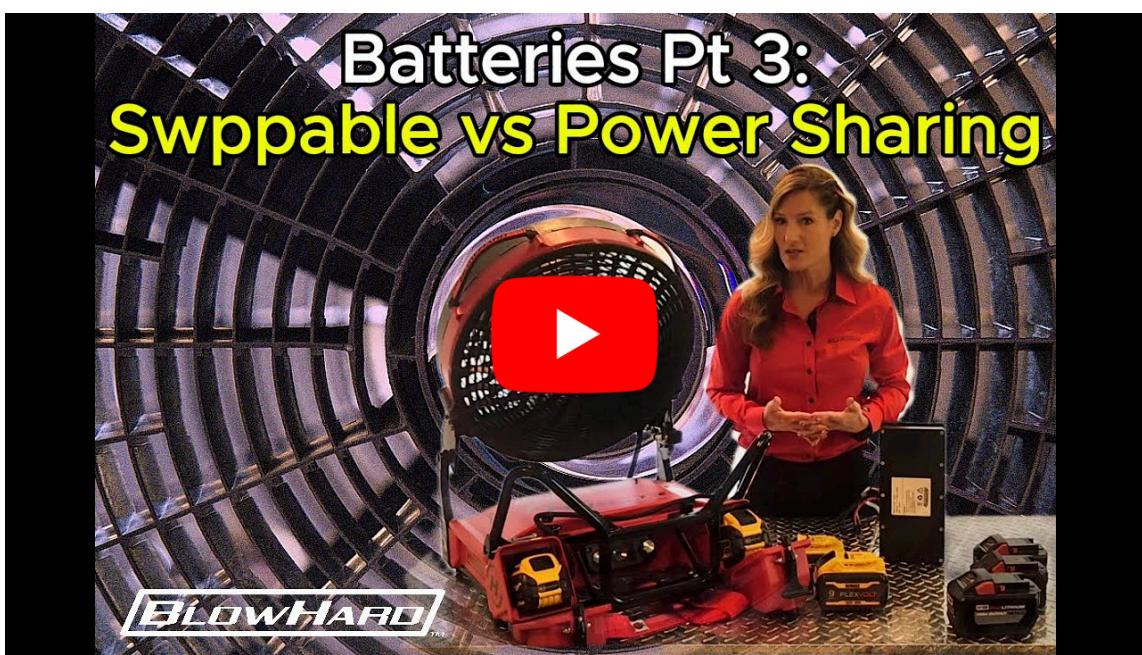

Part 3 of 3:  
**Hot Swappables**

**vs**

**BlowHard Power Sharing**

Information in this video introduces  
**BlowHard Power Sharing.**

Our new technology allows the Hottee to  
constantly monitor each swappable battery  
independently to deliver the highest amount of  
power possible while still protecting against  
overheating and damage.

**Did You Know?**

When you purchase a BlowHard fan,  
you can do so proudly!

We are family owned & operated, and work hard  
to get it all done right here in Oregon!

BlowHard is also an OEM  
(Original Equipment Manufacturing) business.

Except for the power supply, we engineer and design every  
part of our fans-no off the shelf stock parts!

Each fan model has more than \$1,000,000 into its design,  
R&D, molds, casting, prototypes, & testing.

We design from scratch, starting with the laws of physics,  
math, airflow dynamics, and fan-law to create PPV fans  
that are compact, powerful, and innovative.

We believe only BlowHard can claim this enormous feat!

### **BlowHard has shifted the industry in impactful ways!**

- \*We created the first Battery-Operated PPV fans,
- \*Are the only to provide high-capacity, integrated batteries,
- \*Designed the first folding PPV fan,
- \*Created Battery-Operated PPV fans light enough for single-person deployment,
- \*Invented High-Flow Expansion Jet Technology,
- \*Engineered the only interactive smart fans with Smart-Tec,
- \*Introduced the first magnetic accessories and cord keepers.

Feel confident that when you purchase a BlowHard, you are  
not only getting a fan that was engineered **for** firefighting,

you are also a partner in funding innovation, development, and helping to advance the industry!

Thank you!

## In Case You Missed Last Month...

We've switched our Newsletter platform, so you may need to "add BlowHard as a safe sender" or "click to view in browser" to watch videos.

## Education Station

### Batteries!

Part 2 of 3:

#### **Integrated vs Hot Swappables**

Information in this video is a key difference between BlowHard fans and competitor fans.

Learn the differences of Power, Capacity and Cycle Life between BlowHard batteries as well as why swappable batteries in other fans have are known to overheat and age quickly.

## Squirt 740 Wh

## Quickee Xtendo 1110 Wh
