Hello from BlowHard!

We continue on with PPV Battery Education
as well as say goodbye to the BH-20...

Education Station

Batteries!

Part 2 of 3:

Integrated vs Hot Swappables

(if you missed part 1 scroll to bottom).

Learn the differences of Power and Cycle Life as well as why swappable batteries have a tendency to overheat and age quickly.

Batteries Pt. 2

Integrated vs Hot Swappable

BlowHARD™

News...

Goodbye & Thank You!

**Our beloved BH-20, the very FIRST
battery-operated PPV fan in the
the industry will soon be discontinued!**

**We will however
continue to service them!**

**Better yet, we created new technology
to upgrade older BH-20's with a Retrofit Kit.**

**The Retrofit Kit comes fitted with a
Quickee Battery + BMS
(Battery Management System).**

**This new technology increases the original 35+
minute runtime to 45-50 minutes,**

**essentially making your fan better
than when you bought it!**

**If an older fan has not had a power supply upgrade,
we recommend replacing it at the same time.**

**So if you love your
BH-20, upgrading is a great option!**

In Case You Missed Last Month...

Greetings from BlowHard!

April was a big month, launching 2 new fans at FDIC and introducing our ground-breaking, science-based model for accurately testing and understanding the performance of PPV fans!

With BlowHard innovations, we're excited to deliver advancements in technology for forward movement in PPV for the Fire and Rescue Industry!

****New Fans!****

****Please note****

**The Hottee and Quickee Xtendo
are *not* in production yet!**

**Our goal is to have these fans to our dealers this
Summer and for sale by Fall.**

****Stay tuned for new fan introduction videos!****
